Subject: SEDFlume consolidation tests plan

Folks,

The plan for now -assuming that the weather next week will not cause any additional delays-, is to start slurring sediment on Sunday November 11. However, if we have delays due to the weather (damages to the trailer, power outages, floods, etc.) we may have to push these tests further into December or January. I should be able to confirm early next week, if that's the case we will move the modeling collaboration meeting for either the last week of November or first week in December.

thanks and apologies,

e
